<sup>\* &</sup>quot;Trends in the numbers of inpatients" are based on the "Surveillance of the Status of Care for Patients with the Novel Coronavirus Infection and the Number of Beds," by the Ministry of Health, Labour and Welfare. In this surveillance, the results as of 0:00 on the presentation date are published.

Regarding the number of severe patients, the subject criteria differ from those for the data published prior to August 14. In the same survey (published on February 5,

Regarding the number of severe patients, the subject criteria differ from those for the data published prior to August 14. In the same survey (published on February 5, 2021), the use rate of secured beds for severe patients in Tokyo was described as "The number of severe patients, 537, was counted based on the national criteria for this survey, and cannot be compared simply with the number of secured beds of 500."

 $<sup>\</sup>uparrow$ ,  $\downarrow$ , and  $\rightarrow$  indicate an increase, a decrease, and the same level, respectively, compared to the previous week.
